Subject Index

Affinity chromatography
isolation and purification of endopolygalacturonase by affinity chromatography in a fluidized bed reactor, B7

Batch reactors
a circulation time model for batch reactors, 101
Binary ion exchange equilibria
the characterization of binary and ternary ion exchange equilibria, 151
Biogas generation
kinetics of biogas generation from water hyacinth, B21
Bubble columns
froth characteristics of shallow bubble columns with sieve plates, 21
turbulence intensity in bubble columns, 55

Carbon dioxide
chemical kinetics of the reaction of carbon dioxide with triethanolamine in non-aqueous solvents, 7
$CaSO_4$
sulphur capture in fluidized bed boilers: the effect of reductive decomposition of $CaSO_4$, 59
Chemical kinetics
chemical kinetics of the reaction of carbon dioxide with triethanolamine in non-aqueous solvents, 7
Chromatographic reactor
periodic operation of a tubular reactor: a simulation study of consecutive reactions in a chromatographic reactor, 31
Chromatography
design equations of chromatography by perturbation method, 165
Circulation time model
a circulation time model for batch reactors, 101

Diffusion
sorption and diffusion of some amino acids in KX zeolite crystals, B1

Electrocarboxylation reactions
a tubular cell with sacrificial anodes for electrocarboxylation reactions, 187
Endo-polygalacturonase
isolation and purification of endo-polygalacturonase by affinity chromatography in a fluidized bed reactor, B7
Entrained flow process
rapid mixing studies in an entrained flow process, 121
Ethanol fermentation
ethanol fermentation of acid hydrolysate of municipal solid waste, B25

Evaporation rates
evaporation rates of liquid drops containing dissolved salts, 181

Flocculation
flocculation in fluidized beds. Bed expansion and calculation of flocculation parameters, 13
Fluidized bed
flocculation in fluidized beds. Bed expansion and calculation of flocculation parameters, 13
Fluidized bed boilers
sulphur capture in fluidized bed boilers: the effect of reductive decomposition of $CaSO_4$, 59
Fluidized-bed catalyst cracking regenerator
fluidized-bed catalyst cracking regenerator modelling and analysis, 71
Fluidized bed reactor
isolation and purification of endo-polygalacturonase by affinity chromatography in a fluidized bed reactor, B7
Fluid network problems
matrix method for the solution of fluid network problems: mixed pressure and flow specification, 1
Froth characteristics
froth characteristics of shallow bubble columns with sieve plates, 21

Gas–liquid–solid fluidized beds
liquid axial dispersion in gas–liquid–solid fluidized beds, 83

Highly soluble single cylinder
mass transfer from a highly soluble single cylinder in parallel flow, 139
Hildebrand's fluidity model
estimation of viscosity of liquid mixtures using Hildebrand's fluidity model, 39

Kinetic behaviour
kinetic behaviour of non-isothermal lime hydration, 93
Kinetic model
a kinetic model for the extraction of nitric acid by tri-*n*-butylphosphate, 111
Kinetics
kinetics of biogas generation from water hyacinth, B21
KX zeolite crystals
sorption and diffusion of some amino acids in KX zeolite crystals, B1

Lime hydration
kinetic behaviour of non-isothermal lime hydration, 93
Liquid axial dispersion
liquid axial dispersion in gas–liquid–solid fluidized beds, 83

© Elsevier Sequoia/Printed in The Netherlands

Liquid mixtures
estimation of viscosity of liquid mixtures using Hildebrand's fluidity model, 39

Mass transfer
mass transfer from a highly soluble single cylinder in parallel flow, 139
Matrix method
matrix method for the solution of fluid network problems: mixed pressure and flow specification, 1
Microporous plane membranes
structure analysis of microporous plane membranes by a Monte Carlo method, 159
Municipal solid waste
ethanol fermentation of acid hydrolysate of municipal solid waste, B25

Nitric acid
a kinetic model for the extraction of nitric acid by tri-*n*-butylphosphate, 111

Ozone
generation of ozone in two-dielectric ozonizer, 175

Perturbation method
design equations of chromatography by perturbation method, 165

Rapid mixing studies
rapid mixing studies in an entrained flow process, 121
Reductive decomposition
sulphur capture in fluidized bed boilers: the effect of reductive decomposition of $CaSO_4$, 59

Sacrificial anodes
a tubular cell with sacrificial anodes for electrocarboxylation reactions, 187
Sorption
sorption and diffusion of some amino acids in KX zeolite crystals, B1
Structure analysis
structure analysis of microporous plane membranes by a Monto Carlo method, 159
Sulphur capture
sulphur capture in fluidized bed boilers: the effect of reductive decomposition of $CaSO_4$, 59

Ternary ion exchange equilibria
the characterization of binary and ternary ion exchange equilibria, 151
Thermal conductivity
measurement of the thermal conductivity of a zeolite, 45
Triethanolamine
chemical kinetics of the reaction of carbon dioxide with triethanolamine in non-aqueous solvents, 7
Tri-*n*-butylphosphate
a kinetic model for the extraction of nitric acid by tri-*n*-butylphosphate, 111
Tubular cell
a tubular cell with sacrificial anodes for electrocarboxylation reactions, 187
Tubular reactor
periodic operation of a tubular reactor: a simulation study of consecutive reactions in a chromatographic reactor, 31
Turbulence intensity
turbulence intensity in bubble columns, 55
Two-dielectric ozonizer
generation of ozone in two-dielectric ozonizer, 175

Viscosity
estimation of viscosity of liquid mixtures using Hildebrand's fluidity model, 39

Water hyacinth
kinetics of biogas generation from water hyacinth, B21

Zeolite
measurement of the thermal conductivity of a zeolite, 45
